

uLearn Naturally

Creative Learning Festival

Haringey | Spring 2020

Growing up mathematics and science was always drummed into us as important subjects to learn. I always felt intimidated by maths for some reason even though I was able to work things out and got good grades in it. So when it came time to teach my first son maths I became overwhelmed by the many topics that this subject has. Where do I start?

uLearn Naturally has helped me,
It can help you and your children too.

This wonderful programme of events will take place over the period nationally known as **British Science Week 2020**. We'll be at the **Chestnuts Community Centre** for most of the programme with some localised events **with selected schools across Haringey**.

All are welcome.

FACULTY OF EDUCATION

SUPPORTING THE GROWING URGENCY
AND IMPORTANCE OF TEACHER TRAINING

As part of the festival we are also touring education centres with **abunDANCE in Schools**, this will start from January 2020 and tour local Haringey primary and secondary schools with special school-time sessions for pupils, teachers and whole family engagement evenings for better experiences of learning with creativity. Our in-schools programme builds up to the public Spring half-term holiday programme.

schools can still apply for
association to the Festival
